

Mersana Therapeutics Announces Poster Presentation at AACR-NCI-EORTC International Conference on Molecular Targets and Cancer Therapeutics

October 23, 2017

CAMBRIDGE, Mass., Oct. 23, 2017 (GLOBE NEWSWIRE) -- Mersana Therapeutics. Inc. (NASDAQ:MRSN), a clinical-stage biopharmaceutical company focused on discovering and developing a pipeline of antibody drug conjugates (ADCs) based on its proprietary Dolaflexin[®] platform, today announced that it will report preclinical data on its second product candidate, XMT-1536, in a poster to be presented at the AACR-NCI-EORTC International Conference on Molecular Targets and Cancer Therapeutic, held October 26-30 in Philadelphia. Presentation details are as follows:

Title: Relationship of NaPi2b expression and efficacy of XMT-1536, a NaPi2b targeting

antibody-drug conjugate (ADC), in an unselected panel of human primary

ovarian mouse xenograft models

Session: Poster Session B, Therapeutic Agents: Biological

Presenter: Rebecca Mosher, M.D., Executive Director, Translational Medicine

Date and Time: Sunday, October 29, 2017, 12:30 p.m. - 4:00 p.m. ET

Poster/Abstract: 119/B119

About Mersana Therapeutics

Mersana Therapeutics is a clinical-stage biopharmaceutical company using its differentiated and proprietary ADC platforms to develop highly targeted drugs with increased tolerability and expanded opportunities to deliver meaningful clinical benefit to patients. Mersana's lead product candidate, XMT-1522, is in Phase I clinical trials in patients with advanced tumors expressing HER2, including breast cancer, non-small-cell-lung-cancer (NSCLC) and gastric cancer patients. The Company expects that its second product candidate, XMT-1536, will enter clinical trials in early 2018. In addition, multiple partners are using Mersana's leading platform to advance their ADC pipelines.
