

Mersana Therapeutics Announces Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)

April 6, 2022

CAMBRIDGE, Mass., April 06, 2022 (GLOBE NEWSWIRE) -- Mersana Therapeutics, Inc. (NASDAQ:MRSN), a clinical-stage biopharmaceutical company focused on discovering and developing a pipeline of antibody-drug conjugates (ADCs) targeting cancers in areas of high unmet medical need, today announced that on April 1, 2022, an authorized sub-committee of the Compensation Committee of the Board of Directors of Mersana granted inducement awards consisting of stock options to purchase an aggregate of 51,150 shares of its common stock to four new employees whose employment commenced in March 2022. The awards were granted pursuant to terms and conditions fixed by the Compensation Committee and as an inducement material to each new employee entering employment with Mersana in accordance with Nasdaq Listing Rule 5635(c)(4).

The option awards have an exercise price of \$4.32 per share, which is equal to the closing price of Mersana's common stock on April 1, 2022. Each option has a 10-year term and will vest over a period of four years, with 25% of the shares vesting on the one-year anniversary of the date of the grant and the remainder vesting in equal quarterly installments over the following three years, subject to the applicable employee's continued service with Mersana on each such vesting date. The options are subject to the terms and conditions of Mersana's 2022 Inducement Stock Incentive Plan and the terms and conditions of a stock option agreement covering each grant.

About Mersana Therapeutics

Mersana Therapeutics is a clinical-stage biopharmaceutical company using its differentiated and proprietary ADC platforms to rapidly develop novel ADCs with optimal efficacy, safety and tolerability to meaningfully improve the lives of people fighting cancer. Mersana's lead product candidate, upifitamab rilsodotin (UpRi), is a Dolaflexin ADC targeting NaPi2b and is being studied in UPLIFT, a single-arm registrational trial in patients with platinum-resistant ovarian cancer, as well as in UPGRADE, a Phase 1/2 umbrella trial evaluating UpRi in combination with other ovarian cancer therapies. XMT-1592, Mersana's second ADC product candidate targeting NaPi2b-expressing tumors, was created using Mersana's customizable and homogeneous Dolasynthen platform and is in the dose exploration portion of a Phase 1 clinical trial. Mersana's early-stage programs include XMT-1660, a Dolasynthen ADC targeting B7-H4, as well as XMT-2056, a STING-agonist ADC developed using the Company's Immunosynthen platform and targeting a novel epitope of human epidermal growth factor receptor 2 (HER2). In addition, multiple partners are using Mersana's platforms to advance their ADC pipelines. Mersana Therapeutics was recently named among the 2021 Top Places to Work in Massachusetts by *The Boston Globe*.
